Summary

Frontend Developer at Q2Pay and B.Sc. Computer Science graduate (CGPA 9.10/10) with a strong foundation in DSA and systems design. Builds and ships production software end to end – Python/Rust backends, React/Flutter frontends, and ML/LLM-powered features (RAG, FAISS, Groq/OpenAI APIs) – across web and mobile platforms. Comfortable owning a feature from design through deployment, and quick to pick up new languages, frameworks, and tools.

Technical Skills

Languages: Python, JavaScript, TypeScript, Dart, SQL, Rust

Frontend: React, Flutter, Material Design 3

Backend: FastAPI, Django, Flask, REST APIs, WebSockets, JWT, RBAC, Actix Web

AI/ML: LLM APIs (OpenAI, Groq, Gemini), RAG, FAISS, Scikit-learn, PyTorch, XGBoost

Data: PostgreSQL, MongoDB, MySQL, SQLite, Redis

DevOps: Docker, Git, CI/CD, Swagger/OpenAPI, Celery, SQLAlchemy, Alembic

Experience

Q2Pay Technologies Pvt. Ltd. **Jun 2026 – Present**
Frontend Developer, Full-time (Sep 2026 – Present) | Frontend Developer Intern (Jun 2026 – Sep 2026) *Mumbai, India*

- Own and ship production frontend features for the Xpentra platform end to end, from requirements to release.
- Maintain and extend reusable internal UI components, improving consistency and development efficiency across the platform.
- Fix production bugs and UI/UX issues; improve performance and cross-browser/device compatibility.

Imarticus Learning **Aug 2025 – Nov 2025**
Data Science Intern *Mumbai, India*

- Performed exploratory data analysis and feature engineering on datasets with 500K+ records.
- Built and optimized ML models using Scikit-learn and TensorFlow, improving prediction accuracy by 22%.
- Developed preprocessing pipelines and automated data workflows, reducing manual effort by approximately 30%.

Projects

Space — Anonymous Geofenced Chat Platform (Full Stack) *Rust, Axum, Flutter, PostgreSQL*
https://github.com/AyushPandey510/anonymous

- Built a location-gated anonymous chat app: Rust/Axum + PostgreSQL backend (21 REST/WebSocket routes), Flutter client.
- Designed a server-side geofence engine (Haversine, smoothing, hysteresis, spoof detection) with session state machine.
- Shipped ∼40 unit/widget tests, async moderation, hashed device IDs, and Docker + nginx + TLS deployment.

SwiftShare — Cross-Platform File Sharing (Full Stack) *Rust, Warp, React, Flutter, SQLite*
https://swift-share-tau.vercel.app/

- Shipped a file-sharing product: Rust (Warp, Tokio) backend on Render, React web (live), Flutter Android client.
- Implemented streaming uploads, share codes with QR, expiring links with download limits, and an expiry sweeper.
- Set up GitHub Actions CI (clippy, fmt, tests, Trivy security scan, Docker health check) with automated releases.

Life Engine AI — AI Decision Platform (Full Stack) *FastAPI, React, TS, PostgreSQL, Redis*
https://github.com/AyushPandey510/LifeEngine

- Built an AI decision-support platform on Groq (Llama 3.1) with FAISS-based RAG memory and document parsing.
- React/TypeScript frontend and FastAPI backend with JWT auth, Redis caching/rate limiting, Celery, Alembic.
- Deployed frontend and backend to production (Vercel/Render) with health/readiness checks and GDPR-style data export.

RustCart API — E-Commerce & Payments Backend *Rust, Actix Web, PostgreSQL, Razorpay*
https://github.com/AyushPandey510/Rust-Ecom-Api

- Built an e-commerce backend in Rust/Actix Web with JWT auth, RBAC, and transactional order and stock management.
- Integrated Razorpay payments with webhooks, rate limiting, JSON logging, OpenAPI docs, and Docker.

PhisGuard — Phishing Detection API & Chrome Extension *Python, Flask, Chrome MV3, Docker*
https://github.com/AyushPandey510/Phis_Shield

- Built a Flask API and Chrome extension (Manifest V3) that score URLs 0–100 for phishing risk in real time.
- Combined heuristics with Google Safe Browsing, VirusTotal, and PhishTank, plus SSL validation and redirect expansion.

Education

Thakur Ramnarayan College of Arts and Commerce **2023 – 2026**
B.Sc. Computer Science — CGPA: 9.10/10 (Overall) *Mumbai, India*

- Coursework: Machine Learning, Data Structures, Algorithms, Databases, Operating Systems, Computer Networks

Honors & Achievements

- Winner — Inter-College Debugging Competition | Winner — Inter-College Algorithm Writing Competition | Winner — Solo Hackathon, Aptech Learning (2024)
